- Umama sheikh -

An entry-level  
software engineer

# Introduction

## OUR STORY

I have just over a year of experience as a junior software engineer with first technology. It's very proud to be a part of information technology. I didn't appeal for any of the project since it's my first task an experience in ByteUprise. Honestly, I focus on enjoying the life I am working for. I am in a track to be an innovative and collaborative skilled person.

## BACKGROUND

I am being a software engineer use coding and problem solving skills to make adjustments to existing software and test new application. I focus on my relationship and family building . maintaining mental health is critical to be successful developer.
